Company Profile

MyDBA

Your data in professional hands

MyDBA was born from a passion for databases, built on a solid ethical foundation, strengthened and balanced through diverse cultures and cemented with common values. The result is an organization that practices their profession with integrity and distinction with a view to developing and maintaining long term relationships.

Our commitment and dedication to the database industry has resulted in MyDBA putting back into the industry as much knowledge and experience as we gain from it, so much so that MyDBA offers the world's first FREE Database Help Desk.

We also share our knowledge by publishing our own White papers and having free subscription to our weekly tips and trips and monthly articles.

MyDBA's social development responsibilities has given rise to the establishment of the MyDBA Bursary Fund which is aimed at the development of database professionals for the continued support of the database industry.

Mission Statement

To have the MyDBA brand recognized as the leading provider of world class technical support for Databases and Operating Systems throughout the African continent.

Vision Statement

To establish an African presence where MyDBA can provide highly skilled Database and Operating System technical support and associated services throughout the African continent at affordable rates and convenience.

Corporate Values

MyDBA is steadfastly committed to building and maintaining strong relationships through our commitment to quality service, based on honesty, integrity and leadership in every aspect of our business.

We have a strong belief in strength through diversity and regard all people with respect and dignity.

WELCOME TO OUR WORLD

SIGNED • SEALED • DELIVERED

At FEINFREIGHT, we believe that our success is based on our ability to identify and understand our clients' needs, maintain and fulfill service levels and continuously develop our systems to better suit customer requirements.

Our offices are kitted out with the latest systems and hand held scanners in order to image our proof of deliveries and transfer them onto our system in real time. FEINFREIGHT is passionate about establishing close relationships with our client base therefore direct and clear communication with our clients is of critical importance.

Why use FEINFREIGHT?

- ◆ We have the latest technology available in order to ensure that all your precious cargo is delivered as efficiently and safely as possible.
 - ◆ We offer a wide range of services.
- ◆ Our management teams are professional and motivated ensuring a rapid response to all collection and delivery requests as well as prompt reaction to queries.
- ◆ We offer a track and trace facility in "real time" on a door to door basis both nationally and internationally.
 - ◆ Our rates are transparent and competitive.
- ◆ Our staff are competent, well trained and sufficiently remunerated in order to stay motivated and meet the ongoing needs of our customers.
 - ◆ We have 16 years of experience and dedication in the industry.
 - ◆ We are able to offer full in house operations for larger clients, requiring on site data input, costing and waybill printing.

Cullinan Diamonds.
the complete South African diamond experience, will bring sparkle to your world

"Cullinan - the most glittering name in South Africa's diamond history, is the source of many of the largest and most renowned diamonds in the world, worn by royals, celebrities and tycoons."

"The picturesque town of Cullinan is home to one of the richest, most famous mines in the world: The Cullinan Diamond Mine.

Cullinan's proud history stretches as far back as 1903, making it the oldest diamond mine still in operation. Highlights include the discovery of such famous stones as the Golden Jubilee, owned by Thai Royalty; the Centenary Diamond; the Marchois; the Premier Rose and the Taylor Burton, worn by the silver screen's legendary heroine and diamond connoisseur.

The Cullinan Diamond Mine's greatest treasure is, undoubtedly, The Cullinan Diamond, the largest stone ever found. This magnificent gem was sized at 3106 carats and was cut into nine major stones - including the Greater and Lesser Stars of Africa, centres of the British Royal Sceptre and State Crown respectively - as well as 76 smaller diamonds.

Cullinan Diamonds is accredited by a number of internationally recognised bodies:

- Member of the Diamond Dealers Club of SA
- The Jewellers Association of SA
- Operating in Association with Roy Blue
- OTC (Optical) and global leader in the manufacture of diamonds

home of the world's most famous diamond

Located on a working diamond mine, Cullinan Diamonds brings the legend of the Cullinan Diamond to life.

Visitors are invited to browse Cullinan Diamonds' vast range of loose, polished diamonds and diamond jewellery, all manufactured to the highest quality standards.

The selection includes a large variety of diamonds of different shapes and colours, quality tanzanite pieces as well as white, yellow gold and platinum jewellery.

Choose a stunning piece from our collection, or visit while our dedicated goldsmiths design a unique setting for your diamond.

Cullinan Diamonds is a preferred stockist of the South African Ideal Cut™ diamond, the only diamond cut which guarantees your stone has maximum sparkle and the only outlet to stock the Cullinan Star Cut™.

All diamonds purchased from Cullinan Diamonds carry international certification of their quality, veracity and value.

The Cullinan tradition of excellence is upheld and nurtured by Cullinan Diamonds' experienced, highly qualified staff. Fluent in a number of languages, your Cullinan Diamonds sales assistant has also undertaken training in diamond grading to the exacting standards of the European Gemological Laboratories.

More than a quality diamond store, Cullinan Diamonds is as much a museum as the mine itself, with large viewing windows enabling visitors to view expert cutters at work with sophisticated machinery, while polishers reveal the fire and brilliance lying beneath the rough stones.

Those who wish to learn more about the world's most glamorous gem will enjoy Cullinan Diamonds' educational tours, focusing on the history of the diamond mining, cutting and polishing process.

KUNZITE
Devotion

The warm lilac-pink tint in Kunzite has been likened to the soft light of an African sunset. This gem occurs tranquilly, floating the mind from all worry. Kunzite embodies the carefree spirit of nature. Madagascar is rich and fertile land. The patient serenity of this rose coloured stone makes it a darling among collectors.

Astrological: Scorpio & Taurus

PERIDOT
Happiness

The Peridot mimics the bottle-green colour of the sun's olive fields found on the hills of Egypt. Adorned by crusaders, the heraldic red brought to Europe in the Middle Ages, it has been mined near the Red Sea for over 1,000 years. Peridot was prized by the ancient Egyptians, who credited it with a host of healing powers.

Birithstone: August

RUBY
Passion

The spellbinding rich crimson glow of the Ruby earned the esteem of powerful leaders for many centuries. With their blood-red colour, Rubies have long been associated with passion. Superstition agrees that love and loveless Rubies are among the finest. In ancient Sanskrit, Rubies were called 'raja' or 'king of Gemstones'.

Anniversary: 4th

SAPPHIRE
Faithfulness

Renowned in monarchical royal blue, Sapphires can also stain in yellow, pink, orange and violet. Newly discovered Africa deposits in Madagascar, Tanzania and Nigeria yield beautiful specimens. It's believed that we can give the Commitments on sapphire tablets. They have long been the choice of monarchs and high priests.

Birithstone: September

TANZANITE
Personal Power

Tanzanite is heralded as the greatest modern-day discovery in the gem world, ranging in hue from deep royal blue to violet. All tanzanite originates from the Mererani hills at the base of Africa's highest mountain, Kilimanjaro, in Tanzania. This African miracle is exceedingly rare with a few dealers' supply left.

Birithstone: December

TOPAZ
Longevity

Like the diamond, African Topaz presents itself in almost a dozen different colours. History recalls Topaz as being a talisman of affection. It has been revered by many civilisations from the Ancient Greeks and Romans to the great minds of the Renaissance. Perhaps most notably, Topaz is said to protect its wearer from injury.

Birithstone: November

TOURMALINE
Hope

No other gemstone displays such a diversity of colour as the Tourmaline. Even more unique, a single Tourmaline can display two or more colours simultaneously. Egyptian legend says that using its journey from Earth's heart to the African sun, Tourmaline collected all the colours of the rainbow, making the rainbow Gemstone.

Birithstone: October

RUBELLITE
Creativity

The most notable member of the Tourmaline family, this gem ranges from shades of light shell pink through to rich berry colours of plum and cranberry. Rubellites display constant brilliance and colour in both natural and treated. Rubellite originates from tropical Africa with the most prized stones found in Nigeria.

Astrological: Scorpio & Sagittarius

AMETHYST
Sincerity

Amethyst has been revered by royalty since the dawn of time. Found in the African continent it has a rich and square history. The deep purple colour of the African Amethyst is said to bestow serenity upon its wearers. Kings, queens and nobles treasured this power to quieten the mind and promote clear and logical thought.

Birithstone: February

AQUAMARINE
Wisdom

Aquamarine is found in Nigeria and Zambia display a more intense, brilliant rich blue than their Brazilian counterparts. This gem was highly prized by the Mariner of old, who believed it brought them luck. Today it is thought to bring luck to a marriage and prosperity to its owner.

Birithstone: March

CITRINE
Precision

A ripe lemon, gold or orange brown tint characterises the Citrine. It is hailed as the stone of the mind. The Citrine enhances psychic powers, creativity and intuition. Centuries ago, travellers carried Citrine as protection from snake venom and malignant spirits. Its protective powers are now used to banish nightmares.

Birithstone: November

EMERALD
Love

Once worn by Cleopatra, emeralds have an illustrious ancestry. They were used in African rituals to measure the devotion of one's lover. Zambia is one of the world's leading fine emerald producers. Rare Zimbabwean emeralds are highly sought after by collectors for their intense colour and clarity.

Anniversary: 20th

GARNET
Constancy

Garnets dazzle the eyes with a kaleidoscope of colour, ranging from green and yellow to fiery orange and juicy red. The world's most powerful Garnets come from Namibia, and East Africa. The Garnet has been guiding wanderers in the dark of their 'New Year'. Garnet will bestow courage and repel evil.

Birithstone: January

MANDARIN GARNET
Enthusiasm

Acquiring its name from the intense hue of the Mandarin Orange, the Mandarin gem resembles a radiant orange. Recently discovered in 1991 near Namibia's Angora border, world of its beauty spread like wildfire, attracting attention from collectors of fine gems the world over. It's a rare gem and at African as the Africa.

Astrological: Aquarius

TSAVORITE
Heaven

This dramatic Garnet is as fiercely green as the abundant sunshine of Kenya's incredibly rare. Tsavorites are named after the Tsavo National Game Park in Kenya. Discovered in the 1960s, this exciting gem is rarer and more durable than Emerald. It brings as it gives strength and fortitude to the traveller.

Astrological: Aquarius

IOLITE
Harmony

This blue to purplish blue gem releases artistic vision, brings harmony to relationships and enhances vision in all aspects of life. Found in Zimbabwe and Mozambique, deep blue Iolite contrast dramatically with the African landscape. It's not for the faint of heart. It's a stone that was used as the first polarising filter by navigators.

Anniversary: 21st

THE AFRICAN GEMSTONE COLLECTION

Africa... treasure chest of the world's finest and most prized gemstones.

Brochure work

Car Design

The OPTIMA™ concept has been conceived with 3 car designs and 14 car finishes

Quality driven, cost-effectively designed

The OPTIMA car perfectly illustrates the notion that elegance can be achieved through simplicity - simplicity is based on an inspired idea.

In the OPTIMA design's case, the idea is introduced by the car operating panel actively illuminating the car. Besides bathing the car in a soft diffused light, the panel also acts as a focal point for passengers.

The design of the COP is of course critical. With a curved facade, it is both simple and handsome. Checkpoints with soft stainless steel target buttons add a touch of luxury as well as providing increased reliability.

Important to the refined appearance are the car panels themselves. In three finishes for different market needs, they are pleasing to the eye and easy to maintain. In fact it is the balance between the aesthetic and the practical that defines the OPTIMA car.

Car Operating Features

The originality of the car operating panel is that it illuminates the car. Curved in shape, it runs the full height of the car for maximum illumination.

A. Faciplate
Curved in white skiplate or brushed stainless steel finish

B. Combined Car Position Indicator and Car Direction Indicator

C. Data Plate
Car capacity, entry, yellow and green pictograms showing when alarm call is made and voice communication is established.

D. Checklets
Satin chrome finish with bakelit materials 10mm high, Braille characters.

E. Target buttons
In solid stainless steel with mirror or brushed finish. Red ring illumination.

F. Ancillary buttons
Door Open and Alarm buttons are positioned beneath the floor buttons. So too are optional keypads.

G. Lighting
Two fluorescent tubes emitting a soft diffused light around the car with translucent plastic diffuser.

Liquid Crystal Display Screen (LCD)
Designed to be safely visible from all angles, the LCD houses the Car Position Indicator and the Car Direction Indicator (both surround finished in satin chrome).

Safer Access

The OPTIMA car is designed to fully comply with the European standard, EN81-70 that provides recommendations to facilitate general lift use and also use by the disabled.

Entrance protection
To prevent passengers being struck by the doors, the OPTIMA design can be fitted with the LAMEDA™ 2. The system consists of a screen of infrared beams which act as an invisible curtain across the door entrance, extending from 25 mm to 1600 mm above the sill.

Car dimensions
Minimum entrance widths for car sizes are:
Type 1 (1450 kg)
Car 1000 x 1250 mm
Accommodates 1 wheelchair user.
Type 2 (1630 kg)
Car 1100 x 1400 mm
Accommodates 1 wheelchair user and one passenger.
Type 3 (1275 kg)
Car 2000 x 1400 mm
Accommodates 1 wheelchair user and several passengers. Wheelchair can be tilted.

Other safety features

Mirror
A mirror enables a wheelchair user to have a clear vision when reversing out of the lift.

Buttons
Soft ring illumination and audible signal denote an activated floor button.
Green ring identification for the lobby button protrudes by 5 mm.

Floor numbers
In relief, and with Braille characters, the floor numbers are 15 mm high.

Audible signals
All audible signals are adjustable from 35 to 65dB.

Car and hall direction indicators
Indicators incorporate 40mm director arrows. An adjustable audio signal denotes arrival, one going for upward direction, two going for downward.

Alarm pictograms
Alarm pictograms on the data plate, together with audible signals, indicate when the alarm button has been pressed and when voice communication has been established.
An optional reduction loop with passengers with impaired hearing.

Handrail
Handrail ends are fitted into the wall for greater safety.

Emergency lighting

Finishes

Skiplate finishes
At once tough and decorative, the stainless steel panels consist of an optional textured PVC finish on a galvanneal steel sheet. Designed to be practical, their various colours also create a bright ambience in the car.

The series of skiplate finishes is enhanced by the white ceiling painted on flat and fits in complemented by the white skiplate car operating panel. Optionally, the COP can be finished stainless steel.

Car facade and car doors are in brushed or polished stainless steel. Flooring is available in a variety of fabric designs or artificial stone.

Skiplate car panels

1. Zircon Blue
2. Sky Blue
3. Sand
4. Cream
5. Grey
6. Green

Stainless steel
The newly designed stainless steel car has a choice of two finishes: brushed or tufted skin.

Emphasis has been placed on durability and all components are designed and tested to meet the highest standards of resistance to occasional or unintentional damage.

To complement the wall panels, the car operating panel has a stainless steel facelate.

Car facade and car doors are in brushed or tufted skin stainless steel.

Flooring is available in a variety of rubber designs or artificial stone.

Stainless steel car panels

1. Brushed
2. Tufted skin

Partnership

How reliably an escalator performs, depends on how well an escalator is built

Defining the plan
The key to a smooth and successful escalator installation is planning. So from the very outset Ots dedicate a team of specialists to plan and implement a project.

Defining the specification is the first imperative and this involves a rigorous analysis of expectations - taking into account all the traffic, technical and aesthetic considerations.

Considerations are step width, incline, positioning, finished building interfaces, 2 or 3 flat steps at an intermediate point, one-cross, parallel or scissor arrangements.

An interchange of questions and ideas provides the route for the ideal escalator specification. And it is this spirit of partnership that enables us to work fast and efficiently and, most importantly, to your complete satisfaction.

Implementing the solution
Equally critical is the actual installation itself. At Ots, we prefer to deliver an escalator in one piece, tested and assembled, so the installation is fast, safe and clean. Once installed, a rigorous maintenance programme is then put into place. Our maintenance programmes are generally recognised as the industry standard.

They form part of a strategic approach designed to keep your escalator - hence your building - running efficiently. An approach, moreover, on which a long-term partnership is ultimately established.

Quality

How reliably an escalator performs, depends on how well an escalator is built

Comfort and reliability are inextricably linked to the quality of components and the expertise of their assembly.

In both respects we set ourselves uncompromising standards.

Comfort is directly related to balustrade rigidity, handrail ergonomics and the liaison between step and handrail movement. Every step is measured and rigorous assembly controls are implemented which ensure each operation against a strict tolerance limit. What's more each stage has to be approved and signed off by a quality control supervisor. The result is a fully synchronized movement which ensures maximum safety and comfort.

Key Benefits and Features

Ots 506 NCE's main components are designed and tested to ensure an average life expectancy of more than 20 years.

An elegant array of options
Glass balustrades - in a choice of smoked, bronze or green glass - provide a clean, contemporary look. A wide variety of decking finishes, handrail colors and balustrade panels are available. High-quality materials such as mirror, stainless steel and marble are among the cladding options. Informative and decorative lighting systems based on LED technology are also available, including balustrade illumination, step hand lighting, under-step lighting and traffic-flow indicators at the embarkation and disembarkation points. This lighting discreetly alerts passengers to the balustrade, enhancing both style and safety.

Environmentally friendly
Ots is equally committed to environmental responsibility. We offer variable frequency drives and intermittent operation packages that not only reduce energy consumption during off-peak times, but also prolong the life of the product. Our environmental policy focuses on both the safety of the materials used and the energy consumed in the manufacturing and daily operation of our products. Of course, special finishes use a non-toxic powder coating technique that is both environmentally friendly and extremely durable. With its reduced energy consumption and 90 percent recyclable materials, Ots 506 NCE has a reduced impact on the environment.

Unrivalled service and support
Ots is the largest escalator and elevator company in the world, operating in more than 200 countries and territories, with more than 17 million elevators, escalators and moving walkways installed worldwide. Ots has always been at the forefront of the industry. We view our relationship with our customers as a long-term partnership. From planning through installation, the entire Ots team is committed to customer satisfaction. With the world's largest network of branch offices and service centres, our highly trained staff - supported by state-of-the-art technology - provides service 24 hours a day, 365 days a year. For more than 100 years, Ots has earned the trust and confidence of its customers through an unwavering dedication to safety, innovation and service.

HOW STRONG ARE WE?

HESA stands for Health & Safety
Be HESA aware & help us stay strong!

INCE taking a closer look at health & safety

HELP HESA!

HESA stands for Health & Safety
Be HESA aware & help us stay strong!

INCE taking a closer look at health & safety

STRONG TOGETHER!

HESA's strength relies on you!
Help HESA, be aware and let's stay strong - together!

YOUR DUTIES:

- Take care of your own health and safety
- Prevent harm to others
- Wear safety clothing and use safety equipment
- Report unsafe or unhealthy conditions
- Report an accident
- Do not interfere with safety equipment

If you have any questions, need more information
or would like to report a health or safety hazard
please contact your Health & Safety Officer.

Work together to keep us strong!

INCE taking a closer look at health & safety
